Benefit/Key outcome of the event in terms of learning/skills/knowledge

The book focuses on multiple aspects of the long historical and cultural relationship between Portugal and its former possessions in Asia. It provides relevant scientific material in the areas of history, linguistics, architecture, and ethnomusicology focusing on Goa, as well as on other parts of Asia where the Portuguese presence was felt over the centuries. This book is a valuable reference and contextualization for academic studies on Goa and also a source of stimulating ideas for future research.
